SUMMARY

Python Developer with 1+ year of experience in Python, FastAPI, REST APIs, and Docker. Seeking to apply strong backend engineering and problem-solving skills to develop scalable applications and support the growth of a forward-thinking technology team.

TECHNICAL SKILLS

- **Backend Development** : Python, FastAPI, WebSockets, SQLAlchemy, SQL
 - **Concurrency Handling** : Async programming, background tasks
 - **API & Security** : RESTful APIs, JWT, OAuth
 - **Containerization / Sandboxing** : Docker
 - **Version Control** : Git, GitHub
 - **Others** : HTML, CSS, JavaScript (Basic)
-

PROFESSIONAL EXPERIENCE

Software Engineer – SecurXpert Technologies Pvt. Ltd. | Mar 2025 – Present | Hyderabad

- Architected **REST APIs and WebSocket services** using Python and FastAPI.
 - Built **authentication and authorization** using **JWT and OAuth**.
 - Designed database models using **SQLAlchemy ORM with MySQL**.
 - Improved performance using **asynchronous tasks and background processing**.
 - Containerized backend services using **Docker** for secure and isolated execution.
 - Participated in **code reviews, debugging, and feature delivery**.
-

KEY ACHIEVEMENTS

- **Reduced compiler response time by ~25%** using asynchronous processing and background tasks.
- **Implemented Docker sandboxing** to securely execute untrusted client code.
- **Built authentication for 300+ API endpoints** in the HRMS platform to strengthen system security.

PROJECTS

Online Coding Assessment Platform

Role: FastAPI Developer

Technologies: Python, FastAPI, Docker, Redis, Linux, Subprocess, MySQL

Sample Project Repository: <https://github.com/saikrishnabadeti/online-compiler>

Key Contributions:

- Built a secure web platform to **compile and execute user-submitted code**.
- Developed **13 REST API endpoints** and **language-specific WebSocket** handlers, enabling real-time multi-language code execution and interactive client-server communication.
- **Supported 8+ programming languages** including Python, Node.js, C, C++, C#, Java, PHP, Bash, and SQL.
- Used system compilers and runtimes such as Python, PHP, OpenJDK, GCC, G++, .NET, Node.js, Bash, and SQLite.
- Created **Docker sandbox environments to run untrusted code securely**.
- Integrated this code execution engine with online assessment workflows, including test case evaluation and result processing.

Human Resource Management System (HRMS)

Role: FastAPI Developer

Technologies: Python, FastAPI, MySQL, SQLAlchemy, JWT, OAuth

Key Contributions:

- Implemented **secure authentication and role-based access control** using JWT and OAuth, protecting **300+ API endpoints** across application modules.
- Programmed backend modules for **device and session management, and employee management**, including **employee onboarding, profile updates, and role assignment**.
- Integrated **IP whitelisting and login location tracking** using MaxMind GeoIP API, enhancing system security by validating user access based on IP location.
- Enhanced real-time **in-app notifications using WebSockets** and **enabled email alerts**.
- **Applied asynchronous programming** to improve performance and ensured proper testing and integration.

EDUCATION

Swarnandhra College of Engineering and Technology – JNTUK, Narsapuram

Bachelor of Technology (Mechanical Engineering) | 2020 – 2023

CGPA: 8.74
