Backend-oriented Full Stack Engineer with 1+ year experience building scalable REST APIs, real-time systems, and data-driven platforms using Java Spring Boot, Node.js, PostgreSQL, and Redis. Strong in system design, performance optimization, and CI/CD. Actively seeking backend / full-stack roles in product-based companies.

Education

University of Mumbai, Bachelor in Computer Engineering Oct 2020 – May 2024

- GPA: 9.1/10.0
- **Coursework:** Data Structures, Algorithms, Computer Networks, Database, Operating System

Experience

Software Developer, Realatte Ventures Limited – Mumbai Oct 2024 – Present

- Designed and built **RESTful APIs using Node.js (Express) and PostgreSQL** supporting CRM workflows with real-time data sync.
- Improved API response times by **30%** using optimized queries and Redis caching.
- Implemented **CI/CD pipelines using GitLab**, reducing deployment time and manual errors.
- Improved Core Web Vitals (LCP, CLS) leading to **15% organic traffic growth**.
- Owned backend modules end-to-end including API design, database schema, deployment, and production monitoring.

Software Engineer Intern, VCET – Mumbai Dec 2023 – Feb 2024

- Developed and optimized frontend consuming REST APIs, improving page speed by 25%.

Projects

Salesmify (AI CRM Platform) Link

- Built a **scalable CRM backend** using Spring Boot & PostgreSQL with Redis caching.
- Integrated **ML-based lead conversion prediction** improving decision accuracy by 25%.
- Implemented secure authentication using **JWT / Auth0 (Spring Security compatible)**.
- Designed APIs with **separation of concerns (Controller–Service–Repo)**.
- Tools: Spring Boot, Python (ML), Next.js, Node.js, PostgreSQL, Redis

Smart Home Automation Management System Github

- Designed a **Spring Boot microservices architecture** for device automation.
- Used **Kafka/RabbitMQ** for async communication between services.
- Implemented role-based access and persistent device state management.
- Tools Used: Java | Spring Boot | Spring MVC | MySQL | Microservices | Kafka | RabbitMQ | OOP | System Design | Scalability | Data Structures

Technologies

Languages: Java, JavaScript, TypeScript, Python, C++

Backend & Systems: Spring Boot, Node.js, Express, FastAPI, REST APIs, WebSockets, GraphQL

Databases & Infra: PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ, Docker

Technologies: Next.js, React.js, Redux, Node.js, Express.js, FastAPI, Rate Limiting, Caching (Redis), PostgreSQL, MongoDB, Prisma

Concepts : System Design, Microservices, Authentication, Rate Limiting, Caching, CI/CD
